ADVANCED SOFTWARE ENGINEERING ASSIGNMENT-3

In this is an App, an image and the location of a person can be shared using a sign in form. In the very first slide of this application, we need fill all the details that are asked to complete. Then once we signup an image need to be taken which is stored temporarily for a moment. Later, when we asked to get the details, this application displays the exact location of the user and an image will be shown on top of it.
